Fenix-NTM® black edge 10 mm thick

DEKTON® by Cosentino 8 mm thick

Teak Thick 20 mm

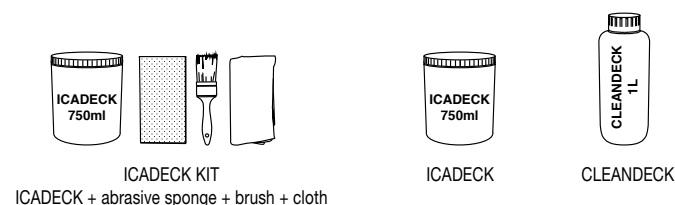

Over time, untreated teak will acquire a typical silvery colour characteristic of this wood finish when exposed to the open air. This aesthetic process does not affect the quality or the resistance of the material.

For regular cleaning operations, use a detergent for outdoor furniture made of wood, or simply use a soft brush and water.

ICADECK (water-based oil) can be applied to prevent oxidation of the surface of the new product.

To remove the grey patina caused by oxidation and restore the original colour of the teak, use **CLEANDECK** (anti-grey detergent). Treatment with **CLEANDECK** must be followed by washing and applying **ICADECK** to a dry surface.

Do not use a high-pressure cleaner, as it would damage the wood surface and fibres. To remove surface scratches, you can use sandpaper or a manual sander.

Code		Price in EURO	Packs	Vol.³	Kg

Maki slatted

Extensible/Fixed - Depth 90/100/124 cm.

Leg finish:

White lacquered aluminium (similar to RAL 9016)
 “Fenix-NTM® London grey” lacquered aluminium (similar to RAL Design0805005)
 Black lacquered aluminium (similar to RAL 9004)
 Olive green lacquered aluminium (colour code “Olive green polyurethane PO08”)

Finish of top:

Teak

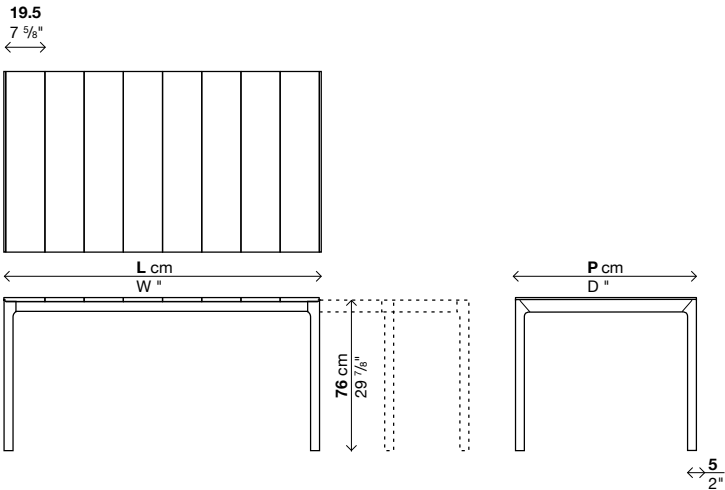

Finish of extensions:

Painted aluminium (in the colour of the legs)

- Tables that extend to more than 250 cm have a top that slightly bends, which complies with accepted quality standards.
- Reinforced packaging, see inside of cover.
- “Casper” protective cover, see page 74.

Fenix-NTM® bordo nero Sp. 10 mm

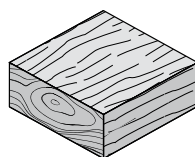

DEKTON® by Cosentino Sp. 8 mm

Dekton è una sofisticata miscela di materie prime utilizzate per la creazione di vetro, ceramica di ultima generazione e superfici in quarzo di altissima qualità

Teak Sp. 20 mm

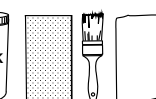

Con il passare del tempo, il teak non trattato otterrà il tipico colore argenteo che caratterizza questa essenza all'aria aperta. Questo processo estetico non ha alcuna influenza sulla qualità o la resistenza del materiale.

Per la normale pulizia del teak si può utilizzare un detergente per mobili in legno da esterni, oppure semplicemente una spazzola a setole morbide e dell'acqua.

Per evitare l'ossidazione superficiale del prodotto nuovo è possibile applicare **ICADECK** (olio all'acqua).

Per rimuovere la patina grigia dovuta all'ossidazione e ripristinare il colore originale del teak, utilizzare **CLEANECK** (detergente antigrigio). Il trattamento con **CLEANECK** deve essere seguito da un lavaggio e dall'applicazione di **ICADECK** su superficie asciutta.

Non usare l'idropulitrice che danneggerebbe la superficie e le fibre del legno. Per eliminare graffi superficiali si può usare della carta abrasiva oppure una levigatrice a mano.

KIT ICADECK

Platten

Fenix-NTM® schwarze Kante St. 10 mm

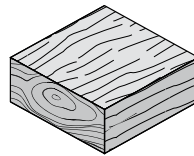

DEKTON® by Cosentino St. 8 mm

Dekton ist ein hoch entwickeltes Rohstoffgemisch, das für die Erzeugung von Glas, Keramik der letzten Generation und Quarzoberflächen mit höchster Qualität eingesetzt wird.

Teak St. 20 mm

Im Laufe der Zeit erhält nicht behandeltes Teakholz jene typische silbergraue Patina, die dieses Holz im Freien auszeichnet. Dieser das Aussehen betreffende Prozess hat keinerlei Auswirkungen auf die Qualität oder die Widerstandsfähigkeit des Materials.

Für die normale Reinigung von Teakholz können ein Reinigungsmittel für Gartenmöbel aus Holz oder einfach eine weiche Bürste und Wasser eingesetzt werden.

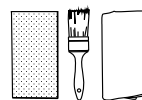

Um eine oberflächliche Oxidation des neuen Produkts zu verhindern, kann eine Schicht **ICADECK** (Öl auf Wasserbasis) aufgetragen werden.

Um die durch Oxidierung entstandene graue Patina zu entfernen und die ursprüngliche Farbe des Teakholzes wieder herzustellen, wird die Verwendung von **CLEANDECK** (Anti-Grau-Reinigungsmittel) empfohlen. Nach der Reinigung mit **CLEANDECK** muss das Holz gewaschen und die trockene Oberfläche mit einer Schicht **ICADECK** behandelt werden.

Verwenden Sie keinen Hochdruckreiniger, da dieser die Oberfläche und die Holzfasern beschädigen würde. Leichte Kratzspuren lassen sich mit Schleifpapier oder einem Handschleifgerät entfernen.

Plateaux

Fenix-NTM® chant noir Ép. 10 mm

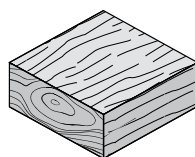

DEKTON® by Cosentino Ép. 8 mm

Dekton est un mélange sophistiqué de matières premières utilisées pour la fabrication du verre, de céramique de dernière génération et de surfaces en quartz de très haute qualité

Teck Ép. 20 mm

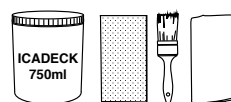

Au fil des années, le teck non traité obtiendra sa typique couleur argentée qui caractérise cette essence lorsqu'on la laisse à l'extérieur. Cette transformation esthétique ne modifie aucunement la qualité ou la résistance de ce matériau.

Pour le nettoyage courant du teck, on pourra utiliser un nettoyeur pour meubles d'extérieur en bois ou bien tout simplement une brosse à poils souples et de l'eau.

Pour éviter que la surface du produit neuf s'oxyde, il est possible d'appliquer **ICADECK** (huile à base d'eau).

Pour éliminer la patine grise dérivant de l'oxydation de la surface et rétablir la couleur d'origine du teck, utiliser **CLEANDECK** (nettoyant anti-gris). Le traitement avec le produit **CLEANDECK** doit être suivi d'un lavage puis de l'application du produit **ICADECK** une fois que la surface sera bien sèche.

Ne pas utiliser de nettoyeur à haute pression qui pourrait endommager la surface et les fibres du bois. Pour éliminer les rayures en surface, on pourra utiliser du papier de verre ou bien une cale à poncer.

KIT ICADECK

ICADECK + éponge abrasive + pinceau + chiffon

Sobres

Fenix-NTM® borde negro Esp. 10 mm

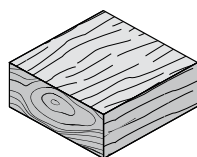

DEKTON® by Cosentino Esp. 8 mm

Dekton es una sofisticada mezcla de materias primas utilizadas para la creación de cristal, cerámica de última generación y superficies de cuarzo de altísima calidad

Teca Esp. 20 mm

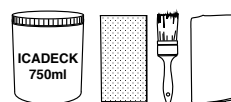

Con el paso del tiempo, la teca no tratada adoptará el típico color plateado que caracteriza a esta madera cuando se utiliza al aire libre. Este proceso estético no influye en la calidad o la resistencia del material.

Para la limpieza normal de la teca se puede utilizar un detergente específico para muebles de madera de exteriores o simplemente un cepillo de cerda blanda con agua.

Para evitar la oxidación superficial del producto nuevo, se puede aplicar **ICADECK** (aceite al agua)

Para eliminar la pátina gris debida a la oxidación y restablecer el color original de la teca, utilizar **CLEANECK** (detergente antigris). El tratamiento con **CLEANECK** debe ir seguido de un lavado y de la aplicación de **ICADECK** sobre la superficie seca.

Se desaconseja el uso de hidrolimpiadoras, dado que podrían dañar la superficie y las fibras de la madera. Para eliminar las rayas superficiales se puede utilizar papel de lija o una lijadora manual.
