18mm easy to clean scratch-resistant anti-reflective melamine faced chipboard (MFC) top finished with 1mm straight ABS impact resistant edging. Finish options: melamine as well as matt lacquered. MFC panel density: 670/730 kgs per cubic meter.

Finish options:

Finish options:

Tempi di produzione: 5 settimane; oltre alle finiture laccate proposte, tutte le finiture della scala RAL sono disponibili.

PORCELAIN TOPS

18mm matt umbra grey painted MDF base with 13mm 45° beveled edges bonded to a 5mm PORCELAIN top with 1.5mm 45° beveled flat edges; the top is either 5mm or 3mm thick depending on the finish.

Finish options:

DECORATIVE METAL EDGES (OPTIONAL EXTRA)

40mm high 2mm steel edges powder coated in matt colours or liquid coated featuring a metallic effect.

Finish options:

MELBOURNE TABLE

PLANTERS

1.5mm steel circular decorative pot powder coated in matt colours or liquid coated featuring a metallic effect. The metal frame is fitted to the bottom of the decorative pot. We recommend setting plants in grow pots and saucers to avoid contact with soil and water. Internal size of small decorative pot ø360mm x 140mm high. Internal size of large decorative pot ø460mm x 180mm high."

POUFFS

Structural seat inner frame made of solid birch wood, fire resistant rubber and polyster resin padding upholstered in a variety of fabrics and leathers

GREEN ENERGY

The Company had installed the photovoltaic system with 4.500 solar panels in a 7.350 m² surface that covers almost entirely the factory. The photovoltaic is able to produce 1Mw of a quiet green energy, that does not harm the environment and is waste-free. With his high production capacity the photovoltaic allows us to reduce emissions in the atmosphere of all those polluting substances and to those that contribute to the greenhouse effects. Consequently, such measures make us save every year 180 tonne of petrol oil, 440 tonne of CO₂, 514kg of sulphur dioxide, 448 kg of nitrogen oxide and 23kg of dust.

TRANSPORT

Packaging is reduced in order to decrease volumes. Goods collections are responsibly managed and organised with the aim of optimise transports, reducing atmosphere emissions.
